TRIAD GOLF BALL

HIGH MOI DESIGN

A high moment of inertia moves weight from the core to the outer layers of the golf ball resulting in faster ball speed and lower driver spin for a more stable ball flight and more fairways hit.

HIGH-FRICTION CAST URETHANE COVER

The ultra-thin cast urethane cover engages longer with the clubface on scoring irons and wedges, generating controlled ball flight and greater spin to attack pins with confidence.

TRI-BALANCED™ CONSTRUCTION

Triad's patented Tri-Balanced™ construction creates uniform material density in the ball's three layers making Triad effectively perform like a one-piece ball for pinpoint accuracy and putts that roll true.

STAFF MODEL GOLF BALL

V-COR™ ADVANCED PERFORMANCE

A unique core composition magnifies energy to generate maximum velocity off the club face for greater distance performance.

4-LAYER SPIN & CONTROL

More layers. Higher spin. Better control. Unmatched distance and shot-shaping off the tee. Tour-level workability on the fairways. Predictable stability on approach shots and exceptional control around the green.

3SIX2 SEAMLESS URETHANE COVER

Our seamless 362-dimple pattern smooths airflow around the ball for a lower ball trajectory and maximum distance performance.
